Professional Summary

Computer Science graduate from Toronto Metropolitan University with strong knowledge of Python and databases, and hands-on experience in software development through university projects and personal applications. Experienced with Python, Java, JavaScript, TypeScript, PHP, and SQL, with a strong foundation in object-oriented programming, software design, requirements analysis, UML modeling, and testing. Currently developing Angular and TypeScript applications, with an interest in building practical and reliable software solutions.

Technical Skills

Languages: Java, JavaScript, Typescript, PHP, SQL, Python.

Frontend: HTML, CSS, Angular, Single-Page Applications (SPA), Responsive Web Design.

Programming: Strong foundation in Python developed through extensive university coursework and continued programming experience throughout the Computer Science program.

Backend and Data: PHP, SQL Relational Databases, NoSQL (MongoDB, MySQL)

Tools: Git, GitHub, Linux.

Projects

Python & Database Coursework — Academic Labs

- Developed Python programs to manage student and course data, implementing CRUD operations, searching, filtering, and data manipulation.
- Worked with Oracle and SQL to query, update, retrieve, and manage relational data.

Departmental Store — E-Commerce Web Application

JavaScript · HTML/CSS · PHP · SQL

- Developed a responsive e-commerce web application with product browsing, shopping cart, checkout, delivery, and invoice functionality.
- Implemented user authentication and database-connected functionality using PHP, JavaScript, and MySQL.

Task Manager — Angular Web Application

Angular · TypeScript

- Developed a responsive task management application using Angular and TypeScript, implementing reusable components, dependency injection, reactive forms, and service-based architecture.
- Built task creation, editing, deletion, organization, search, filtering, form validation, and persistent data storage.

Time/Bus Information System — Visual Basic

- Designed and implemented a GUI with Visual Basic, applying user-centered design and usability principles.
- Developed booking and scheduling functionality while applying interface design concepts including layout, typography, and visual organization.
